

SYNERGY
AIR PRODUCTS PVT. LTD.

FACILITY & SERVICES

• Infrastructure Built for Reliable Gas Supply

From gas production and storage to installation, distribution and handling, our integrated capabilities support safe and dependable gas supply.

Our Facility

Gas Filling

Gas filling & handling infrastructure

Cryogenic Storage

Liquid gas storage and handling

Cylinder Operations

Filling, handling and distribution

Transportation

Dedicated logistics for gas distribution

OUR SERVICES

- Single Cylinder & Cylinder Banks
- Micro Bulk Liquid Gas Systems
- Bulk Installation
- Onsite Gas Generation Plants
- Manual & Automatic Gas Distribution Manifolds
- Pressure Reducing & Cylinder Manifold Systems
- Laboratory Gas Handling Systems
- Process & Utility Piping / Tubing
- Gas Cabinets, Purification & Control Systems
- Regulators, Valves, Hoses, Gauges & Fittings

POWERING INDUSTRY WITH SOLUTION. DELIVERING WITH PRECISION.

High-purity industrial gases, medical gases, liquid gases, refrigerants and engineered gas solutions – delivered with a focus on quality, safety and dependable supply.

From Gas Supply to Gas Systems Reliable Solutions for Industry.

About Synergy Air

4 Decades of Group Experience in Gas Solutions

Established in 2005, Synergy Air Products Pvt. Ltd. delivers Industrial, UHP and bulk gas solutions backed by 4+ decades of group experience. With advanced facilities in Sanaswadi, Pune, we focus on quality, safety, reliable supply and responsive technical support across diverse industries.

Industrial Gases | UHP Gases | Bulk Solutions | Gas Equipment | Technical Support

20+
Years of
Experience

Multiple
Industries
Served

Reliable
Supply & Timely
Delivery

INDUSTRIAL GASES

- **High-Purity Gases for Diverse Industrial Applications**

Reliable industrial gases for manufacturing, fabrication, pharmaceuticals, food processing, chemicals, electronics and other critical applications.

Our Range

Oxygen (O₂)
Combustion, cutting & industrial processes

Nitrogen (N₂)
Inerting, blanketing & process applications

Carbon Dioxide (CO₂)
Food, beverage & industrial applications

Argon (Ar)
Welding & specialised processes

Mixture Gases
Application-specific gas compositions

Speciality Gases
High-purity requirements

LIQUID GASES

- **Efficient Bulk Supply for High-Volume Requirements**

Liquid gases designed for customers requiring reliable bulk supply, efficient storage and continuous availability.

Our Range

Liquid Oxygen

Liquid Nitrogen

Liquid Argon

Liquid CO₂

Supported by cryogenic storage and handling infrastructure for dependable liquid gas supply.

REFRIGERANT GASES & PSA GENERATORS

- **Refrigerant Gases**

Reliable Refrigerants for Cooling Applications

Quality refrigerant gases supporting efficient and consistent refrigeration and cooling performance.

Our Range

R-134a
Reliable refrigerant for refrigeration and cooling applications.

R-410A
High-performance refrigerant for efficient air-conditioning systems.

R-32
Efficient refrigerant for modern air-conditioning systems.

PSA GAS GENERATORS

- **Generate Gas On-Site. Supply with Confidence.**

Onsite gas generation solutions designed to provide a continuous supply of industrial gases while supporting efficient and dependable operations.

Solutions

Oxygen Generators

Reliable onsite oxygen supply for continuous industrial applications.

Designed for consistent purity, efficiency and uninterrupted operations.

Nitrogen Generators

Efficient onsite nitrogen generation for consistent process requirements.

Supports reliable supply while reducing dependence on delivered gas.

Ideal for industries seeking a reliable gas source with onsite generation capabilities.
